

# Safety Systems Designer

## Release 2.4

### New Product Announcement

AVAILABILITY DATE  
November 2021

#### PRODUCT DESCRIPTION

The Safety Systems Designer is a comprehensive planning solution for rapid configuration of EN 54 fire alarm systems

- Neutral and detailed terminology
- Intuitive user interface with immediate visual feedback on the configured products and system overview
- Constant plausibility check of the system limits
- Available in 17 languages (user interface and outputs)
- Free download

#### NEW FEATURES

- Quick start - Specify a fire alarm system in a few seconds!  
Based on the provided Excel import template, the total quantities of addressable peripherals in a system can be rapidly imported to Safety Systems Designer.  
The quick start import feature allows to automatically and evenly distribute these peripherals to the minimum number of required loops and panels.
- Product portfolio maintenance:
  - AVENAR panels & keypad:
    - . Availability status update from "Available soon" to "Available" for the countries Belgium and Russian Federation
  - Conventional High performance signaling devices:
    - . Max. allowed number on (panel) interface modules
    - . Availability status changed from "Available soon" to "Available" for multiple countries
  - Conventional Linear heat detector (VdS):
    - . Connection via interface module via FLM-420-l8R1-S (instead of FLM-420-RHV)
    - . Sensor cable selection added
    - . New accessories added (FCS-LHD2EN-DOW and FCS-LHD2EN-FIX)
    - . Obsolete accessories removed (FCS-LHD2EN-SLE and FCS-LHD2EN-CLIP)
- Registration maintenance:  
Data protection notice updates for Chinese traditional (english added) and czech languages
- Bugfixing

- Country portfolio maintenance:

The following countries were removed from the list in the registration mask and from the list of project countries:

Algeria  
Angola  
Armenia  
Bahrain  
Benin  
Botswana  
Burkina Faso  
Burundi  
Cape Verde  
Chad  
Comoros  
Congo  
Congo Democratic Republic  
Djibouti  
Equatorial Guinea  
Gabon  
Ghana  
Greenland  
Guinea  
Ivory Coast  
Kenya  
Kyrgyzstan  
Lesotho  
Liberia  
Madagascar  
Mali  
Mauritania  
Moldova  
Niger  
Rwanda  
Sao Tome and Principe  
Senegal  
Seychelles  
Swaziland  
Tajikistan  
Togo  
Tunisia  
Turkmenistan  
Uganda  
Zambia

(When an existing project created in one of these countries is opened, the Project country is reset to <neutral>)

## BENEFITS

Benefit	Feature
Optimized monitored planning	Thanks to transparent feedback and close to reality visualization of the system
Faster planning	Thanks to quick start and mass editing features
Reliable planning	Thanks to constant plausibility check of the system limits
Easy-to-use tool	Thanks to generic terminology as well as intuitive and fast navigation
Rapid installation	Thanks to small sized installation file, no need for activation of local admin rights and comfortable setup assistant
