

Waterproof Requirements

Please install the product in accordance with the manual and abide by the following waterproof requirements. Our company does not assume any responsibility if your device is damaged by water due to improper waterproof measures.

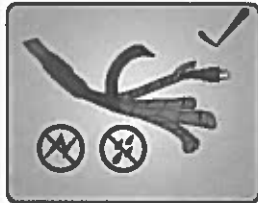

Avoid exposing the tail end of a cable.

Avoid immersing cable connectors in accumulated water.

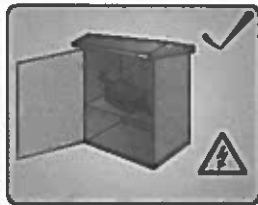

Insulate tail cables before waterproof treatment.

Apply silica gel to closely-fit joints for waterproof purposes.

Place the power adapter in a power distribution box.

Restore and fasten the device after dismantling.
